ERROR: cannot find Matlab 2014b runtime in location:

/Applications/freesurfer/7.2.0/MCRv84

It is looking for either:
bin/glnxa64/libmwlanchermain.so (Linux 64b) or
bin/maci64/libmwlanchermain.dylib (Mac 64b)

The hippocampal/amygdala and brainstem modules require the (free) Matlab runtime.
You will need to download the Matlab Compiler Runtime (MCR) for Matlab 2014b.
To do so, please run the following command (you might need root permissions):

fs_install_mcr R2014b

For further details, please visit <https://surfer.nmr.mgh.harvard.edu/fswiki/MatlabRuntime>
