

**Social-Cognitive and
Affective Development Lab**

Now Hiring: Postdoctoral Researcher

The [Spatial Cognition and Navigational Neuroscience \(SCANN\)](#) and [Social-Cognitive and Affective Development](#) Laboratories at the University of Florida are hiring a postdoctoral researcher who will lead behavioral and fMRI experiments related to the cognitive neuroscience of spatial navigation in aging and age-related pathology.

The position will be co-supervised by Dr. Steven Weisberg and Dr. Natalie Ebner, in collaboration with Dr. Dawn Bowers, to lead behavioral, fMRI, and real-time fMRI neurofeedback experiments related to spatial navigation strategies in adulthood, healthy aging, and Alzheimer's disease-related pathology.

The initial position is a 2-year appointment, with subsequent renewals depending on funding availability. Preferred start date is **March 1, 2021**, but is negotiable. Salary will be paid at the NIH postdoctoral levels.

If interested, please contact Steven Weisberg (stevenweisberg@ufl.edu) and Natalie Ebner (natalie.ebner@ufl.edu) by email and include a CV and two letters of recommendation. We will accept applications until the position is filled.

Required Qualification: PhD in psychology, neuroscience, computer science, biomedical engineering, or a related field.

Preferred Qualifications: (1) Experience with virtual environment design (Unity3D, SteamVR, Vive); (2) Experience with fMRI design and analysis (including FSL, Matlab, or Python tools; knowledge of network neuroscience methods is a plus); (3) Experience with cognitive aging and/or Alzheimer's disease; (4) Experience with real-time fMRI neurofeedback.
